

Summit Version 8.8.1

Bugs Fixed

Maps

- Resolved an issue with Soil Sampling Operations. The ID and Sample ID labels were getting switched causing the previewed data points to appear abnormally out of order. The correction was made, and the Sample ID label is now viewable in Maps.

Reports

- Corrected an issue with FarmRite Mapbook reports. The Soil Sampling point overlays were intermittently missing on certain Mapbook reports. The correction was made, and the soil sampling point overlays are appearing on the identified Farmrite Mapbook Reports.

Upcoming Discontinued Functionality

- As we continue to look for ways to increase our efficiency and provide our customers with the upmost value and support through Summit, we would like to inform you of the decision to move forward with **eliminating** the **logistics** functionality from our Summit platform in the **early Fall to late Winter of 2023**. Please feel free to contact our customer support team should you have any questions.
